COMMENTS ON EXAMINER'S REASONS FOR ALLOWANCE

Applicant recognizes that in accordance with M.P.E.P. § 1302.14, the Examiner's reasons for allowance need not set forth all of the details as to why the claims are allowed. In the above-referenced application, Applicant does not concede that the Examiner's stated reasons for allowance are the only reasons for which the claims are allowable. In particular, Applicant does not concede that all of the identified limitations—i.e.,

The present invention is directed to a method and an apparatus for processing network package having multiple engines collectively providing multiple program threads. The independent claims 1, 16, and 22 identify a uniquely distinct feature "at least one of the threads accessing a self-destruct register that automatically resets to a null value after a read of the self-destruct register to determine if a packet processing task is awaiting performance, and wherein if a one of the plurality of program threads accesses a non-null self-destruct register value representing a packet processing task awaiting performance, the self-destruct register automatically resets to a null value and the one of the plurality of program threads causes the packet processing task to be performed " and in combination with other limitations as set forth in the independent claims.
